

Soft Close Drawer Runners

Discover the world of **Soft Close Drawer Runners** and how they can improve safety, reduce noise, and eliminate the frustration of slamming drawers.

What are Soft Close Drawer Runners?

Soft close drawer runners are mechanisms that allow drawers to close smoothly and quietly. They use a dampening mechanism to slow down the closing speed and prevent slamming.

Benefits of Soft Close Drawer Runners

1 Improved Safety

Soft close features prevent fingers from getting caught in fast-closing drawers, making them especially safe for households with children.

2 Noise Reduction

Say goodbye to the bang of slamming drawers. Soft close drawer runners significantly reduce noise, providing a quieter and more peaceful environment.

3 Prevents Slamming

The soft close mechanism slows down the closing speed, preventing drawers from slamming shut, reducing wear and tear on both the drawer and its contents.

Types of Soft Close Drawer Runners

Full Extension Runners

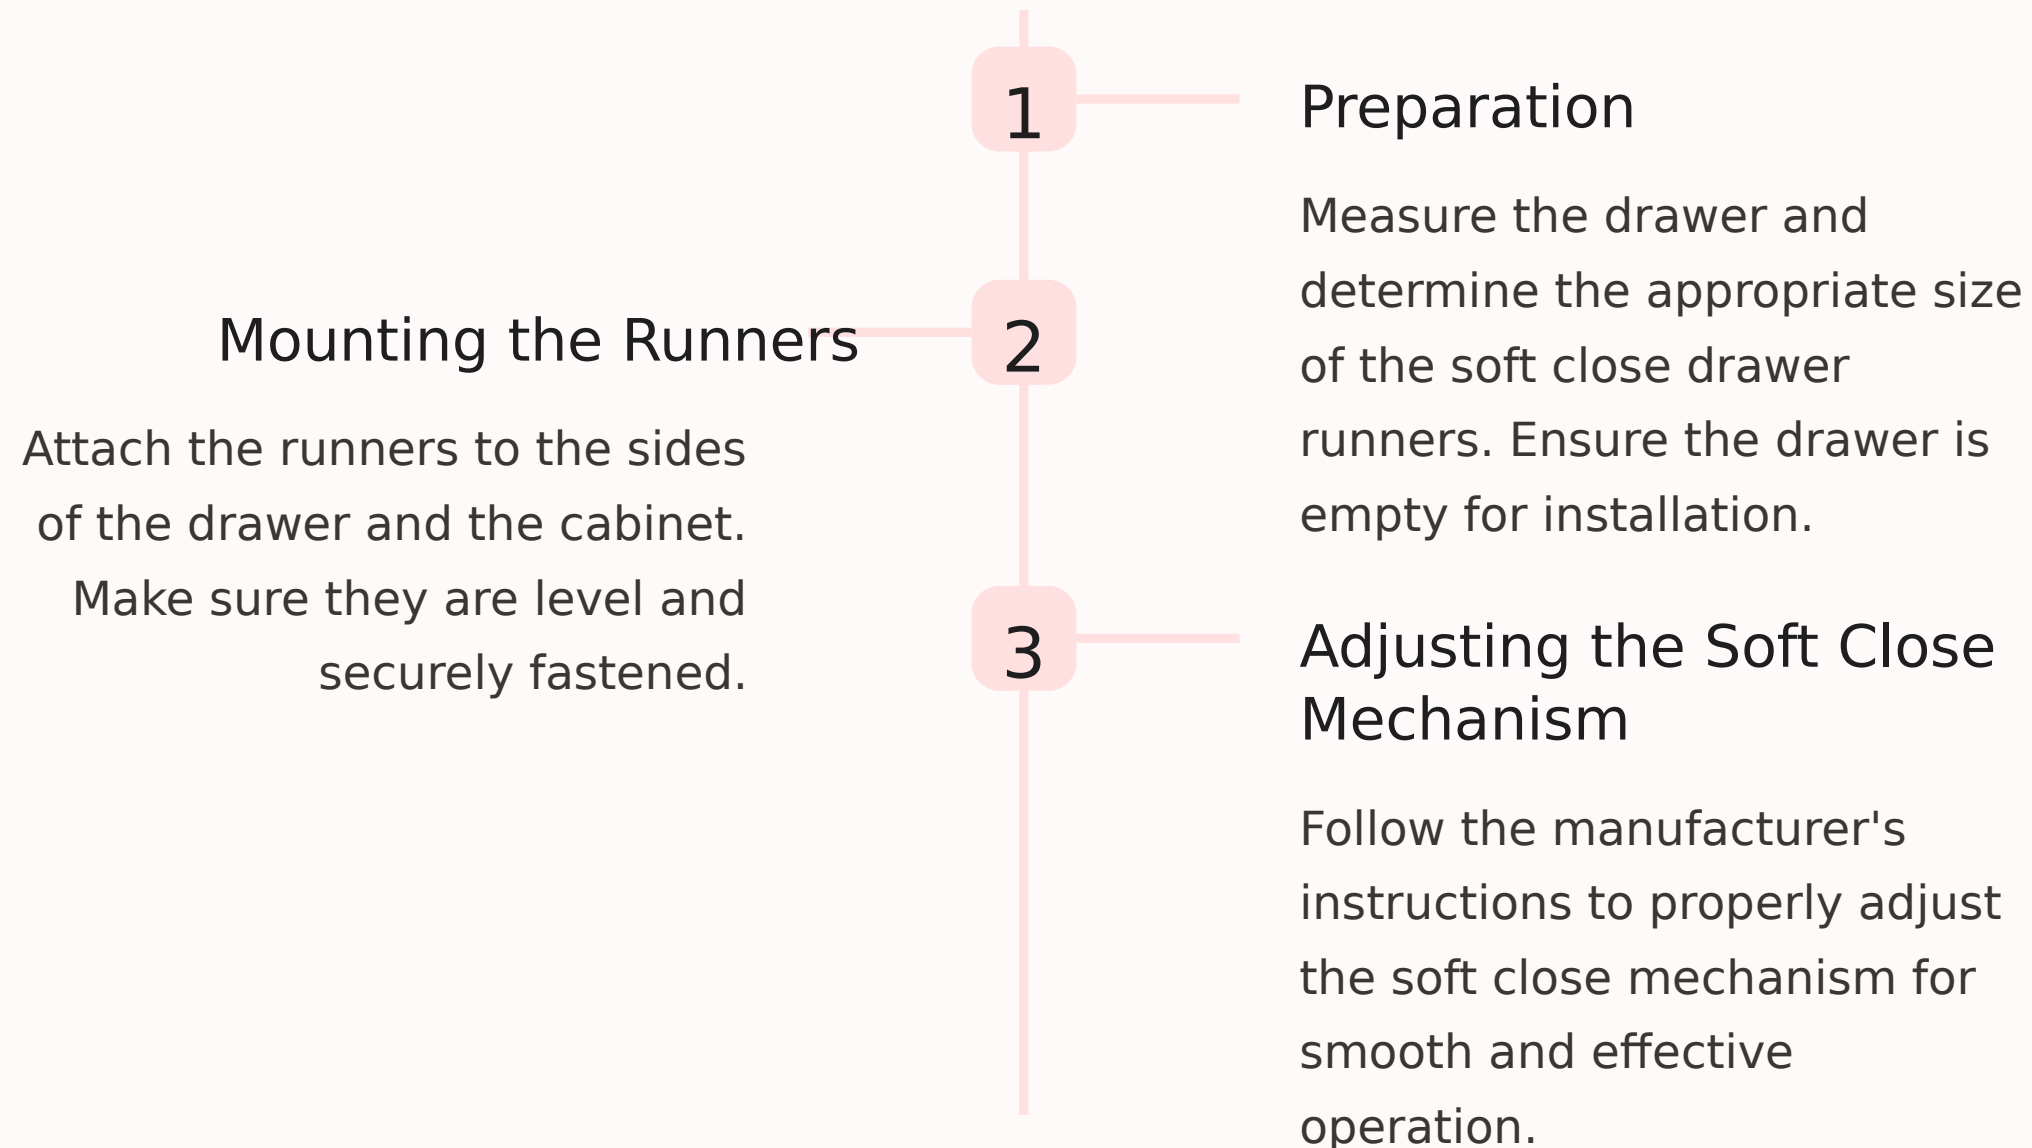

These runners allow the entire drawer to extend fully for easy access to items at the back. Ideal for maximizing storage space.

Concealed Runners

Concealed runners are hidden from view when the drawer is closed, creating a clean and streamlined look.

Installation Process

Considerations When Choosing Soft Close Drawer Runners

Weight Capacity

Ensure that the chosen soft close drawer runners can support the weight of the items typically stored in the drawer, preventing any issues or damage.

Compatibility with Drawer Size

Consider the depth, width, and height of the drawer to select the appropriate size and type of soft close drawer runners.

Durability and Quality

Invest in high-quality soft close drawer runners made from durable materials for long-lasting performance and reliability.

Conclusion

Soft close drawer runners elevate the functionality and convenience of your drawers while providing added safety and noise reduction benefits. Upgrade your drawers today!
